herby certified that this plot is true and correct as to the
 rty lines and all improvements shown thereon, and was prepared
 on actual survey of the property made by me or under my
 vision; that all monuments shown hereon actually exist, and their
 size, size, type and material are correctly shown. The field data
 which this plot is based has a closure precision of one foot in
 3 feet and angular error of 2" per angle point and was adjusted
 the Compass rule. The linear and angular measurements shown
 to plot were obtained by using a TOPCON GPT-3007 TOTAL
 STATION.

net was calculated for closure and is found to have a minimum
 closure of one foot in 1,804,358 feet.
